1 Introduction & Objectives

1.1 About AIC

Agriculture Insurance Company of India Limited (AIC) has been formed under the aegis of the Government of India and promoted by 6 Public Sector Companies as a specialty Crop Insurance provider to the Indian farming community. AIC was incorporated on 20th December 2002 with an Authorized Share Capital of INR 15 billion and a Paid-up Capital of INR 2 billion. AIC commenced business operations from 1st April 2003, by taking over Crop Insurance operations from its major Promoter, General Insurance Corporation of India.

Currently, AIC covers 25 million farmers under its various crop insurance schemes, making it by far the largest Crop Insurance Company in the world. Of these, more than 86% belong to the small & marginal category. The major challenge is to reach the remotest farmer in the country and service him at an affordable cost. If every last-mile farmer is to be reached by AIC or vice-versa, the service loading on the premium ticket would become financially crippling to him.

Since our Company is engaged in the service of the farming community of the country, the overwhelming majority of whom are poor, we have modeled our resource pattern in accordance with those economic compulsions. Accordingly, to keep our management costs to the ground, AIC functions with only around 300 employees on the rolls but insures around 25 million farmers. We operate out of 18 Regional Offices only but have to deal with around 150 thousand Bank Branches & Primary Agricultural Co-op. Societies at the grassroots level.

1.2 Project Objective

AIC intends to engage Data Science/Consultancy firm for implementation of Tableau Software for data analytics.

2 Scope of Work

The following Tableau dashboards are to be implemented in a phased manner.

- 2.1. Visualizing yield data geospatially (with details up to Tehsil) to identify geographical trends and patterns from the data. This includes representation of historical business and claims statistics.
- 2.2. Geographical Heat map for each Tehsil with distance covariance matrix to understand the variability in yield for each Tehsil and their degree of association with other surrounding Tehsils for claim analytics.
- 2.3. Correlation measure between clusters to identify the least volatile clusters to arrive at the optimized selection of clusters in each state for overall optimized business mix.
- 2.4. Geospatial smoothening to arrive at proxy spatial yields based on distance weighted yields of nearby clusters.
- 2.5. Time series analytics to identify and fit stochastic yield variables for CAT loading and reserving.
- 2.6. Scenario testing to arrive at optimal target portfolio and budget vs actual comparison.

Development of each of the above Tableau Dashboards must include the following:

- 2.7. Total 6 Six Dashboards will be developed and 14 days training (2 days per dashboard and 2 days summarising all the dashboard after completion) and handholding will be provided to AIC officials
- 2.8. Dashboards must be interactive, user friendly and must possess the ability to drill-down to the deepest dimension possible.
- 2.9. Dashboards must be fully hosted online, and only authenticated users must be able to access the content.
- 2.10. Architecture guidance with user access, content management and installation services should be taken care by the bidder throughout the Contract timeline.
- 2.11. Maintenance of the dashboards, architecture of Tableau pipeline and change in layout or structure of dashboard must be taken care by the bidder throughout the contract timeline.
- 2.12. Wrangle geo-spatial data in Open source tools (R or Python) to estimate the distance covariance matrix with adjacent boundaries should be done by the bidder.
- 2.13. Raw Data Manipulation/ Automation needs to be done using open source software (R or Python) which would be an input to Tableau
- 2.14. Integrating the village level/ sub-district level shape file with tableau
- 2.15. Shape file with geographical coordinates for Tehsils will be provided by AIC.
- 2.16. Licensing cost for Tableau will be borne by AIC.
- 2.17. The Selected Bidder shall first develop 3 Dashboard. Then its performance shall be reviewed by AIC, if found satisfactory the engagement shall continue. If performance of the Bidder is not satisfactory, the contract and engagement shall be terminated. 50% of the cost of the developed Dashboard and the performance bank guarantee has to be forfeited by the Bidder.
