## 12. Assessment of loss/ shortfall in yield:-

- a) **Crop Cutting Experiments** : State shall maintain a single series of crop cutting experiments, i.e same set of CCEs and yield estimates are used both for crop production estimates and Crop Insurance. In instances, where required number of Crop Cutting Experiments could not be conducted due to non-availability of adequate cropped area, the yield estimates for such insurance unit area can be generated by using methods as (i) Clubbing with neighboring/ contagious units or (ii) adopting yield estimates of next higher units or (iii) adopting the yield of neighboring insurance units with maximum correlation.
- b) **Assessment of Claims** : If actual yield (AY) per hectare of insured crop for insurance unit (calculated on the basis of requisite number of CCEs) in insured season falls short of specified threshold yield, all insured farmers growing that crop in the defined area are deemed to have suffered short fall in yield of similar magnitude. PMFBY seeks to provide coverage against such contingency. Claims shall be calculated as per following formula-

$$\frac{(\text{Threshold Yield} - \text{Actual Yield})}{\text{Threshold Yield}} \times \text{Sum Insured}$$

Where Threshold Yield for a crop in a notified Insurance Unit is the Average Yield of best five years out of last seven years as notified by State Govt./ UT) multiplied by applicable Indemnity Level for that crop.

As per revised Operational Guidelines of PMFBY, there is a provision of imposing penalty to Insurance Companies and Banks, i.e. 12% interest rate to be paid by the Insurance Companies to farmers for delay in settlement of Claims beyond two months of prescribed cut-off dates.

## 13. Calculation of Threshold Yield (TY) :

According to provisions provided in revised OGs of PMFBY, there is rationalization of methodology of calculation of Threshold Yield (TY) which is based on moving average of best 5 out of last 7 years for calculation of Claims amount. The Unit-wise TY for Kharif, 2019 is attached vide **Annexure – C**. The data of TY is final for the settlement of Claims during Kharif, 2019.

## 14. Joint Committee :

There will be a joint committee for assessment of crop damage in each District. The District committee will comprise District Agriculture Officer of Agriculture Department (as a Chairman), Sadar Kanungo of Revenue Department (as a member) and representative of

Implementing Agency (as a member) of concerned District. The Committee has to issue the loss intimation order within seven days from the adverse seasonal event. The Joint Committee has already been notified by the Govt. of H.P. vide letter No. Agr-B-F(1)-3/2016 dated 26<sup>th</sup> May, 2016. The Weather data as per requirement may be taken from the Reference Weather Stations (RWS) which are annexed at **Annexure – “D”**.

For the purpose of assessment of on account payment of claims and claims for prevented sowing/planting risk, the Joint Committee shall decide the eligibility on the basis of Weather data/long term average rainfall data/satellite imagery supported by estimated yield losses at notified Insurance unit level. Insurance Companies have to settle the Claims (in r.o Prevented Sowing/On account for Mid Season adversity/Localized Claims) without waiting for the second installment of final subsidy. Insured Farmers have to intimate individual claims within 72 Hours (instead of 48 Hours) through any Stakeholders and directly on Portal.
